

# FOCUS

## Education & Tutoring services

### The Focus

**Mission:** Turn math challenges into authentic understanding

**Sessions:** Focused one-hour lessons using current schoolwork

**Method:** Step-by-step guidance, correcting mistakes, clear explanations

**Focus:** Emphasize process and reasoning to build lasting skills

**Value for Parents:** Consistent support, less frustration, students stay on track in math

### The Tutors

**Sanjana**

**Grade 12**

Hi, I'm Sanjana! I'm a hardworking and community-minded student with a 93% average who's involved in French Leads, Green Team, Student Library Council, Clothing Upcycle, and Pathways to Healthcare. I'm patient, approachable, and love helping others feel confident by breaking tricky concepts down into simple, stress-free steps. If you're looking for someone who can make school easier and help you feel ready for tests, projects, presentations, I'd love to work with you!

**Julia**

**Grade 12**

Hello! My name is Julia Tchen. I am a well-rounded, positive, and diligent QE student with a 97% average. I am the founder of Clothing UpCycled, executive member of FrenchLeads, apart of Green Team, Model United Nations, Senior Library Council, and I represent my school in swimming and javelin. I always bring a smile wherever I go, am patient, understanding, and I am determined to help others succeed. I love working with students so don't be afraid to approach me with any questions you may have. I'm always happy and ready to help!

### How Focus Works

1

**Ensure your child is in grades 4-11 needing assistance in mathematics**

2

**Book an appointment through the online form**

3

**Free consultation call upon request**

**Enjoy the 2/5 tutoring model**

**2 tutors educating 5 students per session**

### Pricing & Services

**\$20 per session / 10 sessions total**

**Saturdays & Sundays**

**REGISTER!**

### Benefit's of choosing Focus

#### 2 Tutor Model

This approach allows peers to collaborate and support one another in learning. By teaching and explaining concepts to each other, students reinforce their own understanding.

"The best way to learn is to teach"

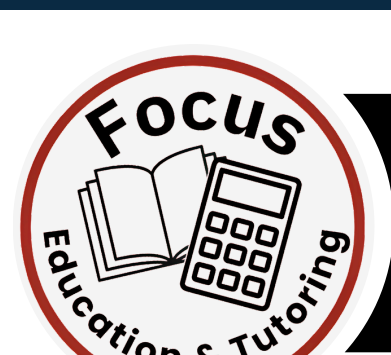

Students are grouped with peers who are working on the same topics and require similar support. This ensures focused assistance, efficient learning, and a stronger sense of collaboration.

#### Pod Learning Model

Constant attention leads to lack of confidence when approaching problems leading to poor study habits.

The Pod learning model allows kids to seek help then challenge their understanding instead of being pampered with constant assistance.

Allowing your child to connect the dots on their own allows for deeper and longer-lasting learning.
